

Think about how the following might affect your business?

Hazards:

- Fire
- Earthquake
- Explosion
- Hazardous Materials- spills or release
- Utility Outage
- Mechanical Breakdown

Assets at Risk:

- People
- Property- buildings & infrastructure
- Business Operations
- Systems/Equipment
- Environment

How quickly your company can get back to business after a fire, flood, or earthquake often depends on emergency planning done today. The regular occurrence of natural disasters demonstrates the importance of being prepared for any emergency. Your business can be better prepared if it plans carefully, puts emergency procedures in place, and practices for all kinds of emergencies. A commitment to planning today will help support employees, customers, the community, and the local economy. It also protects your business investment and gives your company a better chance for survival.

Are you Prepared?

Roughly 40 – 60 percent of small businesses never reopen their doors following a disaster. **But you can!**

Help us to help you!

It is critical to the overall recovery of a community for its business sector to get up and running as rapidly as possible. We call this business continuity planning.

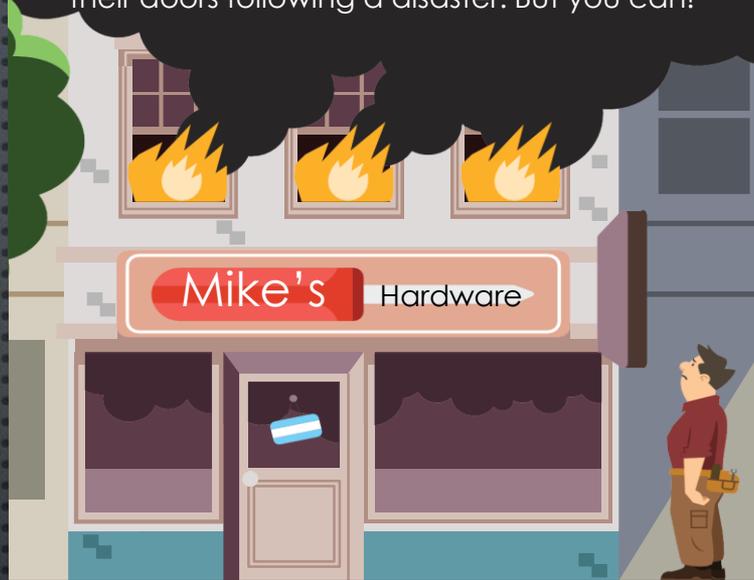

Economic recovery can only happen when businesses are open and people have gone back to work.

Business continuity planning can be a challenge on top of the already busy day-to-day work of running a profitable business.

Take that challenge!

Make Your Business Resilient

40-60 percent of small businesses never reopen their doors following a disaster. But you can!

Be Prepared for Everyday Disasters

Have a Continuity Plan

1 in 5 companies spend no time maintaining their plan.

Following a disaster, 90% of smaller companies fail within a year unless they can resume operations within 5 days.

Disaster Recovery Plan:

IT Redundancy

Important Records

Emergency Supplies

Emergency Kits for Employees

How to be Prepared

Make an evacuation plan and exercise it regularly

Know how you'll notify your employees, customers, and stakeholders

Have redundancy for key resources like power, equipment, and supplies

Create a Business Continuity Plan to become operational again quickly
